

GUP ROLLER SERIES

With over 12million units sold globally, the GUP Series is our most popular roller offering the best value for money in light and medium bulk materials handling.

We've been manufacturing GUP rollers since 1980, using a fully automated production line that guarantees GURTEC's German engineering quality in every roller, with the shortest lead times in the market.

LIGHT DUTY

TUNNELING

PROCESS INDUSTRY

Premium Sealing

Fitted with our in-house manufactured 3-piece labyrinth sealing system, the GUP series includes all GURTEC standard design features

Assured Quality

The GUP production process is fully automated using the highest technical manufacturing standards to ensure quality in every roller.

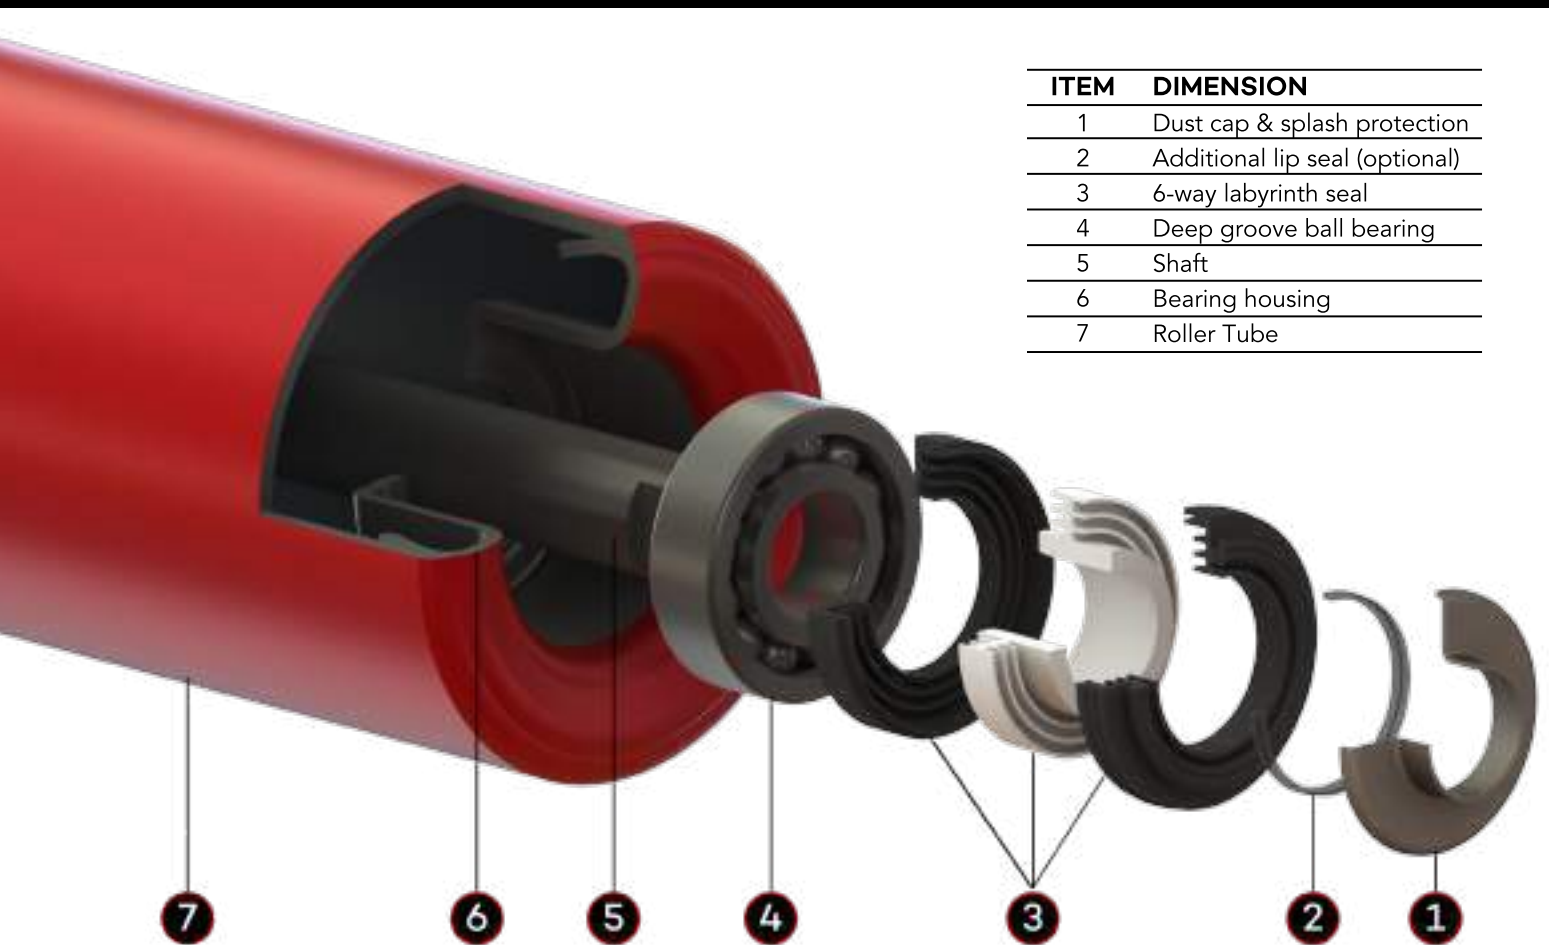

Welded End Cap

Robust, fully welded end caps are integrated into the GUP Rollers, creating a dust and waterproof seal.

MAIN DATA

Tube Diameters	63.5 mm, 88.9mm and 108 mm
Tube Thickness	1.75mm, 2.9mm and 3.25mm
Shaft Diameter	Only 20mm
Bearing Type	6204
Standard Length	200 - 1150

ITEM	DIMENSION
1	Dust cap & splash protection
2	Additional lip seal (optional)
3	6-way labyrinth seal
4	Deep groove ball bearing
5	Shaft
6	Bearing housing
7	Roller Tube
